SHAHMEER SHAHID

Full-Stack Developer & AI Automation Builder

Islamabad, Pakistan | github.com/heyshahmeer | linkedin.com/in/shahmeershahid | shahmeershahid.vercel.app

PROFESSIONAL SUMMARY

Full-Stack Developer and AI Automation Builder focused on practical automation systems, AI agents, and containerized web applications. Hands-on with Next.js/React, Node.js, FastAPI, PostgreSQL/MongoDB, Docker, GitHub Actions, n8n, RAG pipelines, and voice agents. Building toward DevOps and cybersecurity through Linux, networking, cloud, CI/CD, and security fundamentals. Open to junior DevOps, automation, and full-stack opportunities where I can contribute through project-based hands-on work.

TECHNICAL SKILLS

AI & Automation: n8n, LangChain, RAG, ChromaDB, Vapi, Groq API, LLaMA 3.3, Prompt Engineering

Frontend: Next.js, React, Tailwind CSS, Redux, Responsive Web Design

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT, Clerk, Python

Databases: PostgreSQL, MongoDB, MySQL, Polyglot Persistence

DevOps & Cloud: Docker, Docker Compose, GitHub Actions, Git, Linux, Vercel, Google Cloud, Kubernetes fundamentals

Security & Tools: Nmap, Wireshark, Burp Suite, Postman, Linux CLI, secure authentication, health-check guards

Languages: JavaScript/TypeScript, Python, C++

EXPERIENCE

Web Development Intern — Gigadevelopers, Haripur | 2024

- Contributed to responsive full-stack web applications across design, frontend implementation, API integration, and deployment.
- Collaborated with senior developers on debugging, code reviews, bottleneck identification, and production fixes.
- Integrated RESTful APIs with frontend interfaces for dynamic content and user interactions.

SELECTED PROJECTS

Scam Radar — Security, Automation & DevOps

• Built a Next.js + n8n system that analyzes suspicious SMS/WhatsApp messages and returns a verdict with explanations, focused on common Pakistan-based scam patterns.
• Implemented security-focused practices including CI checks against committed *.env* files, no raw-message storage, and protected n8n administration.
Stack: Next.js, n8n, Docker, Docker Compose, GitHub Actions

AppTrackr — Full-Stack & DevOps

• Engineered a containerized project-tracking application with a multi-service backend and PostgreSQL persistence.
• Implemented JWT token rotation, bcrypt hashing, endpoint protection, health checks, and automated build/test validation with GitHub Actions.
Stack: Next.js, Node.js, Docker, GitHub Actions, PostgreSQL, Tailwind CSS

NeuroGastronomy AI — RAG Assistant

• Built a RAG-based recipe assistant using LangChain and ChromaDB for retrieval over unstructured knowledge.
• Developed FastAPI and Next.js interfaces for retrieval, prompt handling, and output guardrails.
Stack: Next.js, FastAPI, Python, LangChain, ChromaDB, OpenAI API

AI Automation Suite — Document & Email Intelligence

• Built practical AI tools for document summarization and email analysis using LLaMA 3.3 (70B) through Groq.
• Connected scraping, LLM processing, and third-party services through n8n workflows; built interfaces with Gradio.
Stack: Python, Groq, LLaMA 3.3, n8n, Gradio

Voice Agents & Workflow Automation

• Developed inbound scheduling voice-agent workflows with Vapi and connected agent interactions to automated business processes.
Stack: Vapi, n8n, AI APIs, workflow automation

EDUCATION

BSc Computer Science — University of Engineering and Technology (UET), Peshawar (Abbottabad Campus)

CAREER DIRECTION

Actively building toward junior DevOps / DevSecOps roles through hands-on Docker, CI/CD, Linux, cloud, automation, networking, and security projects. Interested in opportunities where strong project execution and willingness to learn can translate into real engineering contribution.
